Private-Denver Nicks 2012-05-01 Please note: this book was written and published prior to Manning's identification as Chelsea. Beginning in early 2010, Chelsea Manning leaked an astounding amount of classified information to the whistleblower website WikiLeaks: classified combat videos as well as tens of thousands of documents from the war in Afghanistan, hundreds of thousands from Iraq, and hundreds of thousands more from embassies around the globe. Almost all of WikiLeaks's headline-making releases of information have come from one source, and one source only: Chelsea Manning. Manning's story is one of global significance, yet she remains an enigma. Now, for the first time, the full truth is told about a woman who, at the age of only twenty-two, changed the world. Though the overarching narrative in media reports on Manning explain her leaks as motivated by the basest, most self-serving intentions, Private paints a far more nuanced, textured portrait of a woman haunted by demons and driven by hope, forced into an ethically fraught situation by a dysfunctional military bureaucracy. Relying on numerous conversations with those who know Manning best, this book displays how Manning's precocious intellect provided fertile ground for her sense of her own intellectual and moral superiority. It relates how a bright kid from middle America signed on to serve her country and found herself serving a cause far more sinister. And it explains what it takes for a person to betray her orders and fellow troops—and her own future—in order to fulfill what she sees as a higher purpose. Manning's court-martial may be the military trial of the decade, if not the century. This book is a must-read for anyone who wants to understand the woman behind it all.

The Low-FODMAP Recipe Book-Lucy Whigham 2017-06-01 This book demystifies the low-FODMAP diet and provides 125 tasty and delicious recipes for a happy gut. Written by a specialist gut dietitian, The Low-FODMAP Recipe Book can help you to take control of Irritable Bowel Syndrome (IBS), functional bowel disorder and digestive distress. Dietary management is key to managing IBS and other gut disorders. The most successful diet for bringing relief for symptoms such as bloating, abdominal distension, excessive wind, diarrhoea and other digestive issues is the low-FODMAP diet, which has been medically proven in rigorous clinical trials to improve symptoms in up to 75 per cent of people with IBS. Because of the diet's success it is quickly becoming an essential treatment for people with a sensitive gut and can help in the management of a wide range of stomach troubles

and gastrointestinal discomfort. The low-FODMAP diet will help you to identify food intolerances, including intolerance of lactose and fructose, and may also be used to help those who are suffering from Inflammatory Bowel Disease (IBD), Coeliac Disease and functional symptoms following gastrointestinal surgery. An expert in the low-FODMAP diet and gut disorders, author Lucy Whigham will help you to understand more about the way your gut functions and what is contributing to your symptoms. This book is an easy guide to why and how the low-FODMAP diet can help, and includes tables of what foods need to be avoided for the elimination phase and beyond. FODMAPs (Fermentable Oligosaccharides, Di-saccharides, Mono-saccharides and Polyols) are naturally occurring sugars that are found in a wide range of everyday foods. They are not fully broken down during digestion and therefore cannot be completely absorbed by the body. Instead they travel through the gut where they are fermented by the bacteria that live in our gastrointestinal tract. In susceptible people (those with a sensitive gut) this fermentation can lead to excessive wind, bloating, pain, cramping and stomach gurglings. FODMAPs also draw water into the gut, which can lead to diarrhoea and frequent bowel motions. Cutting out foods that are high in these fermentable carbohydrates and following a low-FODMAP diet can help you to regain control over your digestive symptoms and thereby improve your quality of life. Once your symptoms are under control you can start to re-introduce FODMAPs to help you identify your individual intolerances and threshold levels. In this way you are empowered with the knowledge of exactly which foods cause you problems, putting you in the driving seat and letting you control your symptoms rather than have them control you.

Trans(in)fusion-Ranjan Ghosh 2020-10-08 Trans(in)fusion is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. It questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(in)fusion resets the dialectics between text and theory.

Merrily is called in when two people are killed in a head-on crash that is also linked to the revamped local pub which, it seems, has injected the valley with a shattering, strobing surge of inner-city nightlife... and drugs. When a dealer is found savagely murdered below the great earthen hillfort of Herefordshire Beacon, police ask: is it a ritual killing, a gangland disposal or a cry of outrage? As Merrily and the police follow separate paths towards the truth, Merrily's teenage daughter, Jane, faces the consequences of her own obsession with a possibly prehistoric site in their home village of Ledwardine. Until, on a night of frenzied violence, in a place at the centre of an ancient, universal mystery, the final, shocking connections are made.

Swimming in the Volcano-Bob Shacochis 2007-12-01 A vibrant portrait of love and politics in the tropics from the National Book Award-winning author: "the finest first novel I have read in many years" (William O'Rourke, Chicago Tribune). Winner of the National Book Award for First Fiction for *Easy in the Islands*, Bob Shacochis returns to the islands with *Swimming in the Volcano*, a "splendid first novel" that illuminates the beauty and life of the Caribbean (Library Journal). On the fictional island of St. Catherine, an American expatriate becomes unwittingly embroiled in an internecine war between rival factions of the government. Into this potentially explosive scene enters a woman he once loved and lost, but who remains a powerful temptation—one that proves impossible to resist. Both an enchanting love story and a sophisticated political novel about the fruits of imperialism in the twentieth century, *Swimming in the Volcano* is as brutal and seductive a novel as the world it evokes. "Scores of island people, from conspiring politicians to barbers on the beach, sprawl across the pages like oleander and hibiscus . . . each of [the book's] scenes is expertly wrought." —The New York Times Book Review

The Evolution of Bruno Littlemore-Benjamin Hale 2011-02-02 Bruno Littlemore is quite unlike any chimpanzee in the world. Precocious, self-conscious and preternaturally gifted, young Bruno, born and raised in a habitat at the local zoo, falls under the care of a university primatologist named Lydia Littlemore. Learning of Bruno's ability to speak, Lydia takes Bruno into her home to oversee his education and nurture his passion for painting. But for all of his gifts, the chimpanzee has a rough time caging his more primal urges. His untimely outbursts ultimately cost Lydia her job, and send the unlikely pair on the road in what proves to be one of the most unforgettable journeys -- and most affecting love stories -- in recent literature. Like its protagonist, this novel is big, loud, abrasive, witty, perverse, earnest and amazingly accomplished. *The Evolution of Bruno Littlemore* goes beyond satire by showing us not what it means, but what it feels like to be human -- to love and lose, learn, aspire, grasp, and, in the end, to fail.
